## FLUORESCENT POWER CORDS W/ LIGHTED END

These are professional grade 12 gauge, 15 amp extension cords that are bright lime green or bright fluorescent red for high visibility and safety.

They are SJTW round and rated at 125 Volts, 15 Amp and 1,875 Watts and feature the see through, molded ends that light up when the power is on so you'll never have to walk back to see if the cord plugged in and running current.

They're American made by Coleman Cable® from a super flexible vinyl compound that gives flexibility down to -45°. These cords are UL Listed and OSHA Approved.

ITEM#:	SIZE:	DESCRIPTION:
079	12/3 x 25'	RED POWER CORD- LIGHTED END
080	12/3 x 50'	RED POWER CORD- LIGHTED END
081	12/3 x 100'	RED POWER CORD- LIGHTED END
082	12/3 x 25'	LIME POWER CORD- LIGHTED END
083	12/3 x 50'	LIME POWER CORD- LIGHTED END
084	12/3 x 100'	LIME POWER CORD- LIGHTED END

# CLASS # 10

## 12 GAUGE POLAR SOLAR CORDS

These are the polar/solar extension cords from Coleman cable. They are 1/3 the weight of those old black rubber cords, but are much more flexible. They are bright yellow, professional grade, contractor's cords.

They have 2 1/2 times the abrasion resistance of the rubber cords, with a jacket rated "SJEOW-A", and are safe to 300 volts. They have 42 strands per wire, making them the most flexible three wire cord at all temperatures down to minus 67 degrees. These are single tap and grounded. They are resistant to most all oils and chemicals and one of the main reasons contractors like them, they just last longer and are the easiest coiling 12 gauge cord on the market.

They are **UL** and **OSHA** approved, and, the best part is that they have the lighted ends, so that you always know when the power is on.

ITEM#:	SIZE:	DESCRIPTION:
PS110	12/3 x 25'	ROUND POLAR/SOLAR CORD
PS108	12/3 x 50'	ROUND POLAR/SOLAR CORD
PS109	12/3 x 100'	ROUND POLAR/SOLAR CORD

### 2 FT. TRIPLE TAP PIGTAIL

These “pigtailed” are short connectors for multiple extension cords off of one source of power. They’re just two feet long, and they have a three outlet “fan” receptacle on one end and the three prong plug in on the other. This allows you to plug in a combination of three extension cords or power tools from one outlet.

These are **US made** by Coleman cable and are **UL** and **OSHA** approved. They are a heavy **12 gauge** cord with an **STW cover**. They are rated at **15 amps /125volts / 1875 watts**.

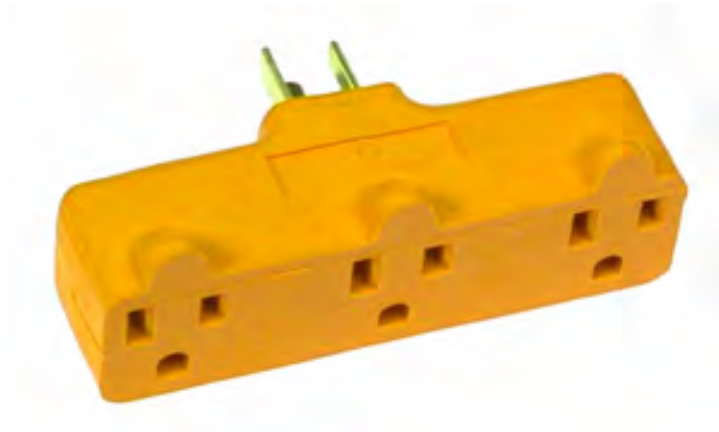

ITEM#:	DESCRIPTION:
078	2 FT. TRIPLE TAP PIGTAIL

# CLASS # 10

## TRI-TAP ADAPTER PLUG

These are the three-way outlet adapters for extension cords. Simply plug the adapter into any 3 prong, (grounded) outlet and the adapter provides you with three prong outlets. They are bright yellow in color so you can find them easily. Of course, they're UL listed and will carry 15 amps and are suitable for up to 125 volts.

ITEM#:	DESCRIPTION:
100	TRI-TAP ADAPTER PLUG

## CLASS # 10

# 2' TRIPLE TAP WITH GFCI

OSHA inspectors all over the country are checking for unprotected electrical cords on the job or in the shop. Now, you don't *have* to buy your cords with "ground fault interrupters", but in a lot of cases you'll get fined for not providing the user with the protection of a ground fault circuit interrupter or 'GFCI' box.

Here is the perfect answer: Triple Tap, two foot long cords with a **GFCI** box attached so you can run up to three different cords off this one **GFCI** box. This is a 12 gauge, heavy duty, section of cord that will handle the load, give you a lot of flexibility in adding to a power source, *and* you can sleep at night knowing that your crew, shop, and wallet *are* protected.

## GROUND FAULT CIRCUIT INTERRUPTER

These are the ground fault circuit interrupters that are made to prevent people from being shocked while using any type of electrically powered equipment. The junction box actually will prevent shock due to faulty tools and equipment or ground faults (short circuits to ground). Fault circuit interrupters sense dangerous ground faults and interrupt power instantaneously to help prevent serious injury.

They feature a heavy duty double vinyl jacket insulation and molded male end. They have a 6' extension cord and two grounded outlets with a test and reset button. And yes they meet and exceed all OSHA and ANSI specs and are UL approved.

### SPEC BOX

MADE BY FIRST ALERT. USA MADE.  
 14 GAUGE PURE COPPER WIRE 65 STRANDS.  
 14 GAUGE RATED AT 15 AMPS, 125V, 60HZ.

\*ALL BRAND NAMES ARE SUBJECT TO CHANGE.

## 15 AMP GFCI SURGE PROTECTOR PLUG

*(Ground fault circuit interrupter)*

These are a workman's best life insurance. If you're doing any kind of work anywhere that involves plugging into electricity, then you have to have one or more of these ground fault circuit interrupter plugs! They're life savers first; tool and machine savers second.

First, they'll save your life because they cut the flow of electricity in less than 25 milliseconds with a trip level of 4 to 6 milliamps. Secondly, they protect anything the user is holding onto – all tools and machinery that are connected through the GFCI plug. They also provide 80 joules of surge protection, as well as test and reset buttons. They are UL listed, and meet OSHA standards.

Since these protector plugs are not waterproof, they are recommended for indoor use only. **IMPORTED BY COLEMAN CABLE**

# BAYCO QUAD-TAP 50' 12/3 CORD REEL

These are professional grade, contractor's units that you can use for extra outlets in the shop or outside, on a patio or driveway. These reels are the contractor's choice for on-site power assistance.

These have a **15 amp** rating and a **15 amp** circuit breaker built right in. You get four (4) grounded receptacles on a **50' length of 12 gauge / 3 wire SJTW cord** that you just pull out to any length. Adjust the ball stop and the cord stays to the length that you pulled out. A simple tug and release of the ball stop and the cord automatically winds back up in the convenient, hard shell casing. You get a big sure-grip handle, and it also comes with brackets for wall mounting or ceiling hanging.
