

CLASS # 25 DRYWALL SCREWS

These are standard, black oxide drywall screws available in fine thread and coarse thread and are used by drywall and sheet metal contractors. They have the sharp tip and are not to be confused with 'Tek' screws which have the drill bit point. They are flat head Phillips drive. Sold by the box only.

CLASS # 25

HEX WASHER HEAD TEK SCREWS

These are self drilling screws, commonly called 'Tek Screws'. They have a drill bit type tip that starts the hole for the rest of the screw. They will start drilling right where they're placed without dancing.

They have a hex shaped head with an attached washer and are used with a nut driver for attaching on all kinds of metal. Used by sheet metal, duct and electrical contractors. Sold by the box only.

#2 x 1" PHILLIPS INSERT BIT

CLASS# 39 SCREWDRIVER SETS

6 PC. MAGNETIC SCREWDRIVER SET

This is one of our most popular sets. There are six drivers—four slotted and two phillips. These have tough, green, see through handles with a metal cap on the top so you can beat on them with a hammer if you have to. They have hexshanks and magnetized tips to hold fasteners “hands free”. **Imported.**

ITEM#:

DESCRIPTION:

641

6 PC. MAGNETIC SCREWDRIVER SET

8 PC. PRO SCREWDRIVER SET

This is a tough screwdriver set. There are five slotted and three phillips. Included are one “stubby” slotted and one in phillips. The largest is 12”. These have black abs handles. They have round shanks and ergonomic handles for the really tough jobs. **Imported.**

CLASS# 39 OTHER SCREWDRIVERS

6 PC. PRECISION SCREWDRIVER SET

These are small screwdrivers—sometimes called “jeweler’s screwdrivers” because they work well on small items, such as glasses, gunsmithing, and small appliances. They feature the black tempered steel blades and a chromed steel, rotating shaft. They come in a fitted storage case.

6 PC PRECISION SCREWDRIVER SET

26” JUMBO SCREWDRIVER

This is the screwdriver for you when brute strength is needed. You can put both hands on the handle for more pressure. You can also use this as a pry bar, a scraper, or anything else you can think of. This is heat treated and comes with a square shaft.

ITEM#:

DESCRIPTION:

26” JUMBO SCREWDRIVER

CLASS# 39

HOLLOW SHANK NUTDRIVERS

Pros ask for these nutdrivers because they have hollow shanks. When turning a nut, the extended part of the bolt goes up the inside of the nutdriver shank. That way, you can quickly “run down” a nut without having to cut off part of a long bolt or screw with a hacksaw.

This is a seven piece set that goes from 3/16” to 1/2”. They have color coded handles for

quickly picking out the right tool for the right size nut. The handles are made of high impact, extruded lexan, and they’re shock resistant.

These are tough, durable nutdrivers that will give you years of dependable use.

CLASS# 39

7 PC. NUTDRIVER SET

This is a 7 pc. set of nutdrivers, for quickly running nuts up and down, or holding a bolt head in place. They're shaped like a screwdriver, but hold different size nuts and bolts like a wrench.

They are color coded for grabbing the right size for the job. The sizes are: 3/16", 1/4", 5/16", 11/32", 3/8", 7/16", and 1/2". They come with a roll up pouch. **Imported.**

CLASS # 39

8 PC. 'GO-THROUGH' SCREWDRIVERS

Known as 'go-through' screwdrivers because the shafts go all the way through the ABS plastic handles and are capped with a round metal head on top of the screwdriver. This makes them so tough that you can beat on them with a hammer, or use as a pry bar without shattering the screwdriver.

This is an 8 piece set with square shanks and the tips are magnetized to retrieve screws or any small metal objects and work great for holding screws in place as you guide them to your target.

Set includes 4 Philips Head and 4 Flat head drivers with the heavy duty bright red, crystal ABS plastic handles and CrV blades. IMPORTED.

Set Includes:

4 Philips Head;

- 1/4" x 6" - #2
- 1/4" x 5" - #2
- 1/4" x 4" - #2
- 3/16" x 3" - #1

4 Flat Head;

- 5/16" x 8"
- 1/4" x 5"
- 1/4" x 4"
- 3/16" x 3"

8 PC. 'GO-THROUGH' SCREWDRIVER SET

CLASS # 39

NEIKO 3 FOOT SCREWDRIVER

These are 36" long, 'two fisted' screwdrivers. They have a big grooved, gripping area on the handle and have a 1/2" square shank driver, so you can put any kind of wrench or 'cheater' on them. No worry of 'over-torquing' these, because they're made from high speed, A36 steel and then hardened by heat-treating and anodizing.

They are a 'go-through' screwdriver as the shafts go all the way through the handle with a tough hardened steel cap on the butt of the handle so they can be used as a chisel or pry bar. You can hammer on it without shattering or bending. IMPORTED

DESCRIPTION:

N091

JUMBO 3 FOOT FLAT SCREWDRIVER

CLASS# 39

NEIKO PRO SCREWDRIVERS

These are “pro” grade screwdrivers. They have heat-treated blades and tips for added strength. They have hardened, chrome vanadium shafts that have been sandblasted and the tips are magnetized. The oversized handles provide greater gripping power and they have hex bolsters below them so you can put a wrench on them. They are bright red for easy identification and the handles have a hole through them for hanging on a hook or peg. This eight piece set includes: 5 slotted screwdrivers (1/4”x 4”;

1/4” x 1 1/2”;

3/16” x 3”;

5/16” x 6”;

and 3/8” x 8”). There are 3 phillips screwdrivers (#2 x 4”;

#1 x 3”;

and #2 x 1 1/2”). **Imported**
