

## CLASS # 34 PVC YELLOW RAINSUITS

The PVC waterproof material on these 2 piece rain suits is fused with a cloth backing that gives them strength and keeps the PVC material off your skin. Plus, they have a loose, mesh lining that provides space and keeps you cool. All seams are triple rolled and thermo-sealed.

They feature full cut 'bib type' overalls and they're cut extra in the seat so they don't ride up to your knees when bending over. They have adjustable straps, adjustable waist, and they have take-in closures at the ankles.

The jackets have full hoods with built in drawstrings and the zipper on the jacket is heavy duty and covered by a snapped flap. The arms are rotated 18° so that when you reach out, the cuffs won't ride up your arm. Imported.

## CLASS# 34

# 3 PIECE GREEN PVC RAINSUITS

Our rain suits are made of a durable PVC that is bonded to a polyester mesh backing for incredible strength. They are 100% waterproof yet fully ventilated with a cape back and fabric lining so you'll stay cool. The jacket has a storm fly, double snapped front with a detachable hood and drawstring. The snaps are made of Duracron, so that the entire suit is non-conductive. The pants are the bib type overalls with fully adjustable suspenders and adjustable sides. The best part is that the sleeves have been rotated 20 so that when you reach out, they don't ride up to your elbows! And the pants are cut a little extra in the seat, so when you bend over, the cuffs don't ride up to your knees. These are suits meant for hard work in foul weather. They are available in a drab olive green. And, I've got them now from small all the way up to triple extra large.

# **GREEN ELASTIC WAIST RAIN SUIT**

When you just want a good rain suit quickly, these are perfect for ease of putting on and taking off. They have an elasticized waist and are cut so they fit nicely over your clothing. And, they're green. So when you don't want to stand out, you're not lit up like a yellow light bulb, you know what i mean. We get 'em out to a lot of golf courses.

They have elasticized wrists inside regular cuffs. There are adjustable snaps at the leg closures, and the hood is attached, and even has a built in visor.

The jacket has a heavy duty zipper with a storm flap over it. These are a breathable, PVC with a full lining sewn in. **IMPORTED**

# **DISPOSABLE RAIN SUITS**

These are light duty disposable rain suits. They are identical to the heavy duty rain suits in appearance, they are even made from the same PVC material just lighter weight. The jacket features a detachable hood with snaps in front. The pants have an elastic waist band for secure fit. Both the pants and jacket are high visibility yellow and are 100% waterproof.

Although these are called disposable they can be worn over and over again. We have every size to suit your needs (S,M,L,XL,XXL).

# CLASS# 34

## RUBBER RAINSUITS

These are heavy duty rubber rain suits – not PVC. They’re made out of heavy rubber bonded to a textile sheeting. All seams are rolled, double stitched, and taped for extra water repellency. The parka-type top has heavy duty, big zippers that you can handle with gloves on. They also have a storm flap with a Velcro closure over the zipper. The hood is roomy with adjustable drawstrings; and the cuffs and ankles have adjustable snap-closers to take up slack in the material. You get two large pockets and the top is fully ventilated in the back and under the arms.

The bib type overalls have wide suspenders with elastic in the back and metal fasteners. They’re cut a little extra in the seat because these are work suits---They don’t ride up on you or bind you anywhere.

## CLASS# 34

# 48" LONG RAIN COATS

These heavy duty coats are 48" long and hang to the knees for full protection when you don't want to climb into a two piece rain suit. For those fast stops, short trips, quick estimates, these rain coats give you all the protection you need. They have detachable hoods and non-conductive snaps. They have two large flapped pockets and they are fully ventilated to keep the heat build-up out, but retain some warmth. They even have the badge holder for security work. We get these out to law enforcement, Fire officials, rangers, contractors, And anyone else that works in the Field.

## CLASS# 34 RAINJACKETS

These are the same rain jackets that are part of our two piece yellow rain suits. They are cut so that they fall below the hip, but not as long as our orange raincoats, which fall to the knees. They have built in hoods with the drawstrings, and the full length zippers are covered by a Velcro storm fly. These are work jackets, which means that when you reach out and do some work, the arms don't ride up to your elbows. They have a mesh lining to keep you cool and snap closures on the wrists to cinch them down in foul weather.

# NEESE HI-VISIBILITY RAIN COATS

These are the same rain coats you see on highway workers from hundreds of yards away—the one's with the large silver, reflective stripes on them. These are 100% waterproof with electronically sealed seams, and cut so that you can work in them without getting all bound up. You get the 35mm thick jacket of vinyl on polyester, cut with raglan sleeves and a storm flap front. You get large, side entry pockets and a fully vented back. The coats have non-conductive snaps and buckles, and large **2 inch wide silver reflective stripes**—two on each sleeve and a large reflective stripe down the middle of the front and across the back shoulders. You also get a detachable hood with a drawstring and snaps. **IMPORTED**

## CAMOUFLAGE RAINSUIT

These are the camouflage rain suits you see in outdoor recreation and on hunters and fishermen everywhere. They are 100% waterproof and have the electronically sealed seams. They're cut so that you can easily move around in them without getting all bound up.

The jacket is cut with raglan sleeves and a storm flap front and has large side entry pockets and a fully vented back. The bib-type trousers with fly are cut a little extra in the seat, so when you bend over, your pant legs don't ride up to your knees.

These suits have non-conductive snaps and buckles and the camouflage pattern blends right in with most outdoor backgrounds and they also feature a hood with a drawstring and snaps which can be detached from the jacket.
