

CLASS # 42

5 in 1 PAINTER'S TOOL

This 5 in 1 painter's tool is the handiest tool in a painter's arsenal. It is a fully hardened, stainless steel blade with a plastic handle that functions as a scraper, a nail puller, a crack widener, paint can opener, and roller squeegee.

The sharp, pointed end is for cleaning and widening cracks for patching, the blade across the top for spreading spackle or for scraping, and the curved cutout is used to scrape excess paint from roller covers prior to cleaning.

The flattened end is used to open paint can lids and hammer them closed and is also used as a nail puller. It measures 7-1/2" long from end to end and it has a reinforced hole on the handle for hanging from a wall or peg board.

CLASS#42

PAINT ROLLER FRAME

Our industrial roller frames really take the abuse because they're a heavy gauge steel frame that won't flex, bend, or break.

The roller spins freely, even when weighted down with a fully loaded, heavy nap roller cover. The wire wheel has five supports, not four---and they are imbedded— not just lightly brazed to the end caps. And the back end cap has a built-in stop, so that your roller cover won't slide, or squeeze off the support frame. The handle itself is molded right onto the frame and is shaped to fit your hand. It also has a threaded inner core, so that you can screw extension poles in easily. Imported

CLASS# 42

PAINT ROLLER COVERS

These are top quality, American made roller covers, designed for the professional painter. They have a double phenolic core—it won't flex or warp, so you're paint rolls on evenly. The nap is epoxy bonded to this core...never a tear or defect! These covers are 100% guaranteed for paints, stains, and most other coatings.

These are not throw-away covers: they are re-usable and easily cleaned with lacquer thinner or other solvents. We carry two grades, both for home and professional use.

PINK: GENERAL PURPOSE ENAMELS, VARNISHES, & STAINS

CLASS# 42

CHIP BRUSHES

These are wood handled multi-purpose brushes.....sometimes known as “chip brushes”. They are fairly good quality, good enough to paint with without leaving streaks or tiny hairs from the brush on the painting surface.

They can be used for a lot of other materials without cleaning them out because they’re so inexpensive....just throw them away. You can spread glue, solvents, tar, or almost anything else, without the hassle of cleaning up.

10 Pc. FOAM PAINT BRUSH SET

This is a 10 piece set of our wood handle foam brushes. They are handy items for use around the shop or home. They are a wedge shaped foam pad, reinforced inside, and a wooden dowel for the handle. They make great utility, disposable paintbrushes. You don't have to worry about getting brush hairs in your paint.

They will work on all latex and enamel paints. They are also perfect for applying glue. **They will not work with varnish or lacquers, as this will melt the foam.**

They are perfect for "cutting in " around edges and hard to reach areas before rolling on paint. They are also great for fine detail work like on moldings and doors

SET INCLUDES:

1" X 5 PCS. 2" X 3 PCS. 3" X 1 PC. 4' X 1 PC.

CHINA BRISTLE PAINTBRUSHES

These professional quality painter's brushes are preferred by many in the trades because of the smooth transfer of material to the painting surface. The 100% black Chinese bristle brush is used primarily for applying oil paints, urethanes, stains, and varnishes. They have hardwood handles that hold up for years to moisture and abuse. They have extra epoxy to secure the feathered edge bristles so you'll never leave them in your paint job.

CLASS# 42

TYNEX NYLON BRUSHES

Our “painter’s choice” brushes made of imported tynex nylon give you the best of both worlds. These brushes can be used for latex, oils based paints, enamels, resins, etc. Almost any blend of oil or latex paint flows smoothly off the feathered ends of these Tynex bristles. Tynex is a pliable, yet tough ingredient of this type of nylon bristle. It allows you to spread the maximum amount of material without dripping or “pushing” globs of paint around.

The extra long, hardwood handles give you superb control and maneuverability.

CLASS# 42

GERSON TACK CLOTHS

Gerson tack cloths give you a mirror-smooth finish on the most critical paint jobs. They pick up and hold all the dust, lint, and sanding residue, and leave the painting surface blemish free.

These are the world's largest selling tack cloths because they're the same ones used by original equipment manufacturers of automobiles, aircraft, boats, machinery, and furniture. They're wax and silicone free, non-toxic, and made from surgical grade, bleached gauze.

Gerson tack cloths are great for any painting application, but especially designed for multi-coat automotive paint applications. They're a full 20" x 12" and individually wrapped and sealed to hold their "tackiness" on the shelf.

There are three grades of tack cloth: blue=light tack; white=medium tack; tan=heavy tack.

We also have Gerson's new blend prep tack cloth for light tack applications in between multi-coat paintings. Blend prep tack cloths are lint-free.

(NOTE: 12 PER BOX/ 144 PER CASE. MUST BE SOLD BY THE DOZEN - NOT MIXED DOZENS.)

PRE-TAPED DROP CLOTH

Pre-taped drop cloth is a painter's best friend because it's quick and easy to use and there is very little clean-up. These are the "perfect masker" brand of drop cloths, used by demanding professionals all over the country. The making tape is USA made, sticks exceptionally well, and removes without leaving a gummy film.

The polypropylene attached right to the tape is a high density, light weight plastic sheet that comes 48" wide or 21" wide.

These rolls of pre-taped drop cloth fit easily in the hand, and are very easy to use. Simply run them along baseboards, ceiling lines, or up against any surface that need to be masked against any type of paint. They are 100' long and 0.5 mil thick.

CLASS # 42

6" x 9" SCUFF PADS

These are the 6" x 9" scouring pads that body shops use for prep work, mechanics use to remove old gasket material, or any of another 1,001 uses!! You see these pads used in household chores, in service vehicles, and in most garages and shops.

They are made from non woven, synthetic fiber bonded with aluminum silicate (green), aluminum oxide (maroon), silicon carbide (gray), or the non abrasive (white). They won't rust, stain or shred and they are washable for repeated use. They're also excellent for use with most solvents.

They come in four colors: Green is semi-course; Maroon is a medium grade; Gray is ultra fine, and White is non-abrasive. They give you tough cleaning power without scratching surfaces.

CLASS# 42
NEIKO 'QUICK-CHANGE'
H.D. UTILITY KNIFE

These utility knives stand out because they are bright yellow, metal bodies, with black rubber inserted in the ergonomic grip area. They are PROFESSIONAL GRADE, not plastic, and will last for years...no cracking, snapping, or breaking when you toss 'em around. These are slightly curved, so they lay comfortably in the hand. They have a side, swing open compartment that holds up to ten extra blades (5 come free), and 'auto-loads' them into the slider mechanism.

These are QUICK-CHANGE ! For a new blade, just push the top button that releases the old blade, and pull it out the front. Then, draw back the slider, and when you push forward, a new blade pushes out the front and fixes firmly in the slide mechanism. You get a new blade in a second, ...locked and loaded. IMPORTED
