

CLASS # 49

3 PIECE 'V'-JAW PLIER SET

These are genuine Channellock® brand 'V-Jaw' tongue and groove pliers. This original, 'V'-Jaw design is for use on round stock and tubing, and right angled teeth grip in all directions for maximum bite and minimum wear.

The patented undercut tongue and groove design provides for no-slip jaw action and the patented reinforcing edge minimizes stress breakage. The new PermaLock® fastener eliminates nut and bolt failures and of course they have the distinctive 'Channellock Blue' comfort grips.

This set features three of their most popular sizes; 6-1/2", 9-1/2" and 12" and, as with all Channellock pliers, they're American made.

3 PC. CHANNELLOCK PLIER SET

CLASS # 49

CHANNELLOCK[®] PLIERS

These are the 'Real McCoy' Channellock[®] brand pliers. They feature right angled teeth that allow them to grip in every direction for maximum bite and minimum wear, and the patented, undercut tongue and groove design assures the strongest, no slip jaw action.

The fastener on the hinge is a patented Permalock[™] fastener that is much stronger, safer, and smoother than the old nut and bolt. The handles have the distinctive Channellock[®] blue dipped comfort grips. American made.

CLASS # 49

CHANNELLOCK[®] SPECIALTY PLIERS

 A pair of 12-inch curved jaw pliers with blue PVC dipped handles and a silver metal head. The jaws are curved and the handles have a textured grip.	<p>12" CURVED JAW PLIERS</p> <p>The curved jaw plier is best for use on pipe and conduit, or use with any round object for a sure grip.</p> <p>It features a 2-1/2" jaw capacity with 7 adjustments, weighs 20 oz. and has the distinctive blue PVC dipped handles.</p> <p>USA made.</p> <p>ITEM#: 442G</p>
 A pair of 14-inch 'nut-buster' pliers with blue PVC dipped handles and a silver metal head. The jaws are curved and the handles have a textured grip.	<p>14" 'NUT-BUSTER' PLIERS</p> <p>The 'Parrot' nose and curved inside of this plier gives the right leverage and the grip necessary to remove tough nuts and bolts.</p> <p>Can also be used as a pipe wrench but is lighter and handier and the new safety stop jaw prevents pinching of the fingers between the handles.</p> <p>Has four adjustments and 2" capacity jaws. USA made.</p> <p>ITEM#: 414G</p>
 A pair of snap ring pliers with blue PVC dipped handles and a black metal head. The jaws are curved and the handles have a textured grip.	<p>SNAP RING PLIERS</p> <p>Also called 'conversion' tools because these one snap ring pliers works on both internal and external snap rings.</p> <p>A simple finger adjustment of the two sliders converts them for use with inside and outside snap rings without having to change the pivot screw. USA made.</p> <p>ITEM#: 907G</p>

CLASS # 49

CHANNELLOCK[®] SPECIALTY PLIERS

 A pair of air brake pliers with blue handles and a silver-colored metal head. The head has a curved, serrated jaw with a hook-like end.	<p>AIR BRAKE PLIERS</p> <p>For trucks and trailers with an S-cam brake system using auto slack adjusters. Provides a fast check of brake clearance between drum and brake shoe.</p> <p>Right angle teeth grip in all directions for maximum bite with minimum wear. A patented undercut tongue and groove design assures a no-slip jaw action and a patented, PermaLock[®] fastener assures no nut and bolt failure. USA made.</p> <p>ITEM#: CL444</p>
--	---

 A pair of locknut pliers with blue handles and a black metal head. The head has a curved, serrated jaw with a hook-like end.	<p>LOCKNUT PLIERS</p> <p>They will fit all 1/2", 3/4", 1-1/4" and 1-1/2" locknuts and are designed for the quick and easy adjustment of electrical locknuts.</p> <p>They will securely hold and adjust to most conduit fitting locknuts made from metal, PVC or plastic and feature a thin profile for using in tight, wire confined electrical boxes. The handle shape allows for both right and left handed use of the tool. USA made.</p> <p>ITEM#: CL960</p>
