BLACK PHOSPHATE

ADJUSTABLE WRENCHES

These are the genuine, World famous Crescent® brand adjustable wrenches, the company that set the bar for adjustable wrenches. An adjustable wrench with any other brand is still referred to as a 'Crescent Wrench'.

They feature a tension spring that stabilizes the jaw and allows the knurl to adjust easily and the black phosphate finish resists corrosion. Manufactured from tough alloy steel and heat treated, these wrenches have proportioned dimensions for greatest strength and minimum weight. The larger sizes have a tapered handle for better two-handed grip and less weight. USA made.
