

CLASS # 36 RUBBER TARP STRAPS

These straps are made of 100% virgin rubber to give them strength and durability. They're available in lengths from 9" to 41" and have heat treated 'S' hooks on each end. The eyes on the straps are extremely tough and hold the hooks firmly in place without danger of 'pull out'.

The rubber is treated with a special chemical that prevents dry rot and Sun damage, so they'll last for several seasons. They're used for tying down tarps, ladders, boards, buckets, piping, tubing, etc.

| ITEM#: | DESCRIPTION: | SIZE: |
|--------|----------------------------|-------|
| US9 | USA RUBBER TIE DOWN STRAPS | 9" |
| US15 | USA RUBBER TIE DOWN STRAPs | 15" |
| US22 | USA RUBBER TIE DOWN STRAPs | 22" |
| US31 | USA RUBBER TIE DOWN STRAPs | 31" |
| US41 | USA RUBBER TIE DOWN STRAPs | 41" |

IMPORTED RUBBER STRAPS

These straps are just like our USA made ones, but lighter duty and less expensive. They lack the added chemicals that keep them resistant to Sun rot and severe weather, but are sufficient for most applications.

CLASS # 36 BLUE PVC TARPS

These blue PVC tarps are stronger than canvas and light enough for one person to handle. They're water and mildew resistant and reinforced with a high density polyethylene fabric enmeshed with a cross weave of fiberglass fibers. This makes a rugged, tear resistant material that's washable and non cracking at 20° Fahrenheit.

They have rustproof grommets every three feet and at every reinforced corner as well as poly rope sewn into all four outer edges for extra strength.

| ITEM#: | SIZE: |
|---------------|------------------|
| 567 | 6' x 8' |
| 578 | 8' x 10' |
| 568 | 9' x 12' |

| 572 | 20' x 40' |
| 575 | 26' x 55' |
| 584 | 30' x 60' |
| 585 | 40' x 60' |

CLASS # 36 GREEN PVC TARPS

These green PVC tarps are constructed the same as the lighter blue PVC tarps but are twice as thick. They feature a mesh 'rip stop' material between the layers of PVC which prevents tearing easily. They also have rust proof grommets and a sewn in poly rope along the edges for reinforcement.

Where blue tarps are designed to cover stationary objects, these thicker, green, PVC tarps will work better for covering a load in a truck for light use on the road or highway.

| ITEM#: | DESCRIPTION: | SIZE; |

| 570G | GREEN PVC DOUBLE THICK TARP | 16' x 20' |
| 571G | GREEN PVC DOUBLE THICK TARP | 18' x 24' |
| 572G | GREEN PVC DOUBLE THICK TARP | 20' x 40' |

CLASS # 36 SILVER PVC TARPS

These silver PVC tarps are constructed the same as our blue tarps but are twice as thick. Unlike the blue and green tarps, however, they are resistant to ultra violet light which can break down PVC material over time.

They feature the same mesh 'rip stop' between the layers of PVC so they won't tear easily and they have the rust proof grommets, reinforced corners, and the poly rope sewn in along the edges for extra strength and protection against the grommets pulling out. Great for covering and protection against direct sunlight.

CLASS # 36 BLACK MESH TARPS

These black mesh tarps are used for shading greenhouses, patios, campsites, kennels or as privacy barriers and truck cover for hauling rubbish or leaves. They have an approximate 73% shade and 27% light allowance and are made of heavy duty polypropylene knitted fabric material.

They have reinforced edges with brass grommets approximately every 18" and they are tear resistant and mildew resistant.

CLASS # 36 CANVAS TARPS

These heavy duty, canvas tarpaulins are 16oz. per square foot of canvas material. They are weather treated and water resistant and great for covering a variety of materials as well as light duty truck loads at slower speeds. (Not recommended or chemically treated for high speed highway use).

They have rugged brass grommets every 2 feet for easy tie down using rubber tarp straps or heavy cord. The sizes below are industry standard sizes and as with all canvas tarps, the finished size is approximately 4" to 6" less per side due to the manufacturing process where the material is hemmed and stitched. Imported.

CLASS # 36

10' x 20' CANOPY WITH FRAME

These canopies are tough, good looking, easy to put up and very useful around the house, shop, carport, at swap meets, or as a boat cover.

The frame is rugged 1-3/8" round tubing with thick walls and made of light weight aluminum. It measures 20' long by 10' wide with four standards on each side and a peaked roof, for water drainage.

The silver colored tarp is a heavy duty, reinforced polyethylene that's been specially treated to resist the sun's ultra violet light and there are quick bungee ball fasteners for the reinforced eyelets located every 18".

Washable, weather proof, shrink proof, and rot proof. Weighs 101 lbs.

CLASS # 36

EPDM RUBBER TARP STRAPS

EPDM, (ethylene propylene diene monomer), is a rubber compound that is extremely resistant to weathering, ozone, and UV exposure. Recommended for any applications where the elastomer will receive excessive exposure to environmental conditions.

It provides very good chemical resistance and in the manufacture of these straps assures a tie down that will last through a myriad of harsh conditions.

These E.P.D.M. tarp straps will not rot or lose stretchability with lengthy exposure to the elements.

They feature rust resistant, steel 's' hooks that will not bend, twist or pull out under heavy use.

CLASS # 36

HEAVY DUTY BUNGEE CORDS

These heavy duty fabric covered Bungee cords are available in various lengths from 18” to 72”. They have an inner core constructed of high tensile strength bands of rubberized nylon that are impervious to all harsh weather conditions.

They won’t stretch out, wear out, pull out, or deteriorate over the years and will withstand the constant stretching. The outside casing of these straps is a tightly braided, white nylon with small blue striping and these Bungees stretch out to twice their unstressed length. Their heat treated, case hardened hooks are coated to prevent scratching.
