

CLASS # 38 BLACK NITRILE GLOVES

Made exclusively for Ace Industrial Supply, our new ‘Viper Grip’ Black Nitrile Gloves are incredibly tough and extremely flexible. They are commercial grade, 6 mil and powder free.

Viper Grip Gloves come in two versions; ‘Black Pearl Grip’ is a smooth surface nitrile glove while ‘Black Diamond Grip’ has a raised textured surface for increased grip on wet and oily materials.

Viper Grip Gloves are perfect for service technicians, auto mechanics, HVAC, tattoo artists, beauty salons, sanitation, chemical handling, plumbing, marine and more. They are tear and chemical resistant and allow for greater dexterity. Packed 100 gloves per box and available in medium, large, x-large and xx-large.

CLASS # 38

BLUE NITRILE GLOVES

Blue Nitrile gloves are a lot like latex gloves, but they're made out of a synthetic rubber. The properties in this glove make them impervious to all chemicals except Benzene, and unlike latex, these Blue Nitrile gloves will not dissolve in acetones, paint thinners, or parts cleaners. This makes them perfect for any kind of cleaning with chemicals in auto body shops, or for house painters, engine rebuilding, etc.

They are lightly powdered with absorbable corn starch to slip on easily and are 5.2 mil thick at the palm, 6 mil on the fingers, and 4 mil on the cuff which is thicker than most latex gloves, so they won't tear up. They're finely textured on the fingers so you can pick up the thinnest item even in grease.

They're form-fitting, long wearing, and extra tough. Packed 100 gloves per pop-up dispenser box and they fit either hand. Available in three sizes.

ITEM#:	DESCRIPTION:
588M	BLUE NITRILE GLOVES - MEDIUM - (100)
588L	BLUE NITRILE GLOVES - LARGE - (100)
588XL	BLUE NITRILE GLOVES - X LARGE - (100)

CLASS # 38

BLUE NITRILE GLOVES

(POWDER FREE)

Blue Nitrile gloves are a lot like latex gloves, but they're made out of a synthetic rubber. The properties in this glove make them impervious to all chemicals except Benzene, and unlike latex, these Blue Nitrile gloves will not dissolve in acetones, paint thinners, or parts cleaners. This makes them perfect for any kind of cleaning with chemicals in auto body shops, or for house painters, engine rebuilding, etc.

They are powder free and 5.2 mil thick at the palm, 6 mil on the fingers, and 4 mil on the cuff which is thicker than most latex gloves, so they won't tear up. They're finely textured on the fingers so you can pick up the thinnest item even in grease.

CLASS # 38

BLACK LIGHTNING NITRILE GLOVES

Black Lightning nitrile gloves are stronger, thicker and resist chemicals better than other gloves in their class. They're quadruple washed so there are no excess chemicals lingering on the glove.

They're ambidextrous, latex free, powder free and feature a textured grip. The super strength and stretch of these gloves prevents tearing and they provide better barrier protection from oils, fuels, solvents cleaners, transmission fluid and other chemicals. These are 100% nitrile with no latex, vinyl or MBT. Packed 100 gloves per box.

ITEM#:	DESCRIPTION:	SIZE:
698M	BLACK LIGHTNING NITRILE GLOVES	MED.
698L	BLACK LIGHTNING NITRILE GLOVES	LARGE
698XL	BLACK LIGHTNING NITRILE GLOVES	X-LARGE

CLASS # 38

COTTON LINER GLOVES

Cotton liner gloves are great for heavy duty work where extra padding or comfort is required. These versatile gloves can be worn alone or together with any other type of glove.

Great as a winter liner inside your regular gloves and sold by the dozen, so they are a great item to have in any truck or tool box. Also used as a light duty examination glove, but these are not sterilized. Import.

ITEM#:	DESCRIPTION:
595	COTTON LINER GLOVES (1 DOZEN)

CLASS # 38 DISPOSABLE GLOVES

LATEX EXAMINATION GLOVES

These disposable latex gloves are ambidextrous and lightly powdered. They are easy to slip on and easy to slip off and allow for the best dexterity while still assuring protection to the hands against paint, soaps, fertilizers, chemicals, and many other materials that are handled on the job.

They are 5 mil thick and packed 100 per dispenser box. Used in body shops, machine shops, factories, utility maintenance, health facilities and anywhere else that hand protection is required. Available in large and extra large and priced by the box.

ITEM#:	DESCRIPTION:	SIZE:
590	DISPOSABLE LATEX GLOVES (100 PC.)	L
590XL	DISPOSABLE LATEX GLOVES (100 PC.)	XL

VINYL EXAMINATION GLOVES

These disposable vinyl gloves are ambidextrous and lightly powdered. They are different from the latex gloves because they won't cause an allergic reaction in some people who have a sensitivity to latex. They also do not stretch like the latex and are much easier to slip on.

These are packed 100 gloves per dispenser box and are used in many different applications like latex but are preferred by those who are 'Latex sensitive'.

ITEM#:	DESCRIPTION:
594	DISPOSABLE VINYL GLOVES (100 PC.)

SPECIALTY GLOVES

HOT MILL GLOVES

These are heavy, 24 oz. 'Hot Mill' gloves that are commonly worn in a steel mill and in foundries and are used for handling hot tools, pipe, or many other instruments requiring dry heat handling.

They feature a 'nap-out' design, (or 'fleece front') on the palms, thumbs, and

forefingers and have a burlap lining in the same area as well as a 2-1/2" wide strip of canvas across the knuckle. Import.

ITEM#:

DESCRIPTION:

597

24 OZ. HOT MILL GLOVES

MONKEY FACE GLOVES

These are 20 oz. bright yellow, chore gloves with a 'clute cut' for comfort and have tight fitting knit wrists.

They're made of heavy, fuzzy, flannel material and very popular in cold weather with landscapers, loggers, and farmers. Import.

ITEM#:

DESCRIPTION:

604

MONKEY FACE CHORE GLOVES

CLASS # 38 PVC DIPPED GLOVES

These are cotton gloves that have been ‘hot-dipped’ in PVC to make them leak-proof. They’re used to protect the hands in most types of chemicals and working conditions and are used by refuse and garbage pickup companies.

Some of the many uses for these gloves include garbage, fertilizers, soaps, and chemicals. They’re available with either a knit wrist, a 12” long gauntlet cuff, or an 18” long gauntlet cuff.

They are a smooth glove but there is also a rough palm style available for slippery, hard to hold materials. Black in color and one size fits most hands.

18” LONG

12” LONG

KNIT WRIST

ITEM#:	DESCRIPTION:

918B	PVC GLOVES - 18” W/ GAUNTLET CUFF

CLASS # 38

RUBBER COATED KNIT GLOVE

These are 10 Oz., string knit cotton gloves that have been dipped in blue rubber on the working side of the gloves. Because they're rubber they'll grip almost anything better than PVC dipped gloves. Great for handling greasy or oily tools and equipment.

They breathe through the uncoated back, so there's no moisture build-up inside the glove. Grey cotton, poly blend, string knit. The medium is a 'one size fits all', but for super big hands, X-Large is also available. Imported.

ITEM#:	DESCRIPTION:	SIZE:
K56PM	BLUE RUBBER COATED KNIT GLOVES	MED.
K56PML	BLUE RUBBER COATED KNIT GLOVES	X-L

CLASS # 38

8 MIL. BLUE NITRILE GLOVES

Nitrile gloves are manufactured using synthetic latex and they contain no latex proteins. They are also three times more puncture resistant than natural rubber so they offer superior resistance to punctures, abrasions and are also used for protection against a variety of chemicals.

Nitrile material has a naturally low coefficient of friction, making them easy to put on. These gloves are powder free, non-sterile, ambidextrous and disposable. They are 8 mil. thick, which is almost twice as thick as standard Nitrile gloves and are packed 50 gloves per dispenser box.

ITEM#:

DESCRIPTION:

888L	8 MIL BLUE NITRILE GLOVES - LARGE (50 PC.)
888XL	8 MIL BLUE NITRILE GLOVES - X-LARGE (50 PC.)

CLASS # 38

ATLAS GREEN NITRILE GLOVES

Atlas gloves are used as common work gloves in almost any application, but especially with greasy and oily parts. They are comfortable because they have a seamless inner lining that is cured in an oil repellent that reduces any wet penetration.

They're also treated to prevent bacteria and mildew that cause odors and irritation and dipped with a patented process that showers a coating of PVC which avoids stiffening, so these gloves are very flexible.

They have a durable, nylon mesh back that allows hands to breathe, and they have the textured, green Nitrile coating on the palms and fingers. These are the best service work gloves because they are durable, puncture resistant, and long wearing.

ITEM#:	DESCRIPTION:	SIZE:
ATL350S	ATLAS NITRILE GLOVES	SMALL
ATL350M	ATLAS NITRILE GLOVES	MEDIUM
ATL350L	ATLAS NITRILE GLOVES	LARGE

ATLAS FISHERMAN'S GLOVES

Developed by Atlas Glove Co. in 1981 for the demanding conditions of the Alaska Commercial fishing industry, these gloves have a seamless cotton liner for great fit and a rough finish for outstanding strength, flexibility and sure grip.

This Atlas classic orange glove is as supple as natural latex but has the chemical resistant properties and pricing advantages of PVC and is the most flexible PVC glove on the market. They're fully coated seamless cotton with a 12" gauntlet cuff.

From the tuna fishery in San Diego, California to the King Crab fishery in Alaska, these gloves are the #1 choice by fisherman.

FINGERLESS LEATHER GLOVES

These fingerless gloves are wrist length and cut a little above the knuckle to give your hands full protection, but leave your fingers free to do the fine work like separate gaskets, picking up o-rings, or feeling around for that lost washer.

They have Velcro enclosures on the back of the wrist, perforated knuckle holes, and extra leather cross-sewn into the palms. They come in black only with double, inside stitching for comfort and great looks. More importantly, this double stitching assures long life and rugged use.

These are not only great work gloves, but excellent for outdoor activities as well. **IMPORTED**

ITEM#:	SIZE:	DESCRIPTION:
4601M	MEDIUM	BLACK FINGERLESS GLOVES
4601L	LARGE	BLACK FINGERLESS GLOVES
4601XL	X-LARGE	BLACK FINGERLESS GLOVES

CLASS # 38

BLUE LATEX COATED WORK GLOVES

These are a generic version of the popular Atlas® brand work gloves that are used everywhere for handling oily and greasy parts. They have the same textured-grip coating on the palm and finger fronts to give you a form fitting glove with an incredible grip.

The backs are left uncoated so that they ‘breathe’ through the grey cotton material and are elasticized at the wrists. And, since they are seamless on the inside, they are extremely comfortable.

These are the perfect gloves to use in wet or slippery applications, where you need a good grip, but at half the price. Import

ITEM#:	DESCRIPTION:	SIZE:
GL100S	LATEX / COTTON WORK GLOVES	SMALL
GL100M	LATEX / COTTON WORK GLOVES	MEDIUM

CLASS # 38

MIG / TIG WELDING GLOVES

These top quality, premium grade cowhide welder's gloves will provide superior protection to hands and forearms whether welding with MIG (Metal Inert Gas) or TIG (Tungsten Inert Gas).

They feature the full leather back with a 5" split Russet, 'gauntlet' cuff. Historically, gauntlets were an important piece of armor, since the hands and arms were particularly vulnerable in hand-to-hand combat.

These welding gloves offer serious protection and safety at a very good price and are available in two sizes. Import.

KNUCKLEHEAD OIL RIGGERS GLOVES

Knucklehead oil riggers gloves feature an extremely tough synthetic leather palm that is washable, breathable, lightweight and more durable than leather. The special neoprene reinforcements on the back of the hand and fingers provide abrasion and shock protection while anti slip patches and palm padding help with tool grip while absorbing shock to the palm area.

The fingers are pre-curved for added comfort and the elasticized wrist ensures a snug, comfortable fit. The thumb has a high absorbency cloth brow wipe and these gloves are fully sewn with high tenacity threads to help prevent blowouts. They are available in high visibility yellow and high visibility orange.

CLASS # 38

KNUCKLEHEAD MECHANICS GLOVES

Knucklehead mechanics gloves feature reverse cowhide palms with padded patches for added protection. The stretch knit back has a sewn in heavy duty TPU (thermoplastic polyurethane) knuckle guard to prevent injury.

All fingers and knuckles are well protected with special neoprene rubber impact pads and they have a secure Velcro wrist closure. Knucklehead gloves are designed for heavy duty work with less hand fatigue.
